

# BUSINESS INTERNET THAT'S NOT THE NBN

RELIABLE PERFORMANCE WITH LOCAL SUPPORT

## GIVING YOU OPTIONS

### The Solution

Countrytell Wireless Internet is designed for business. Every element of our network is carefully managed to ensure consistent performance is achieved day in and day out. Our P2MP (point to multipoint) Business Internet provides a cost effective option for almost any use case. Custom designed P2P (point to point) solutions are also available for mission critical applications and network performance.

Countrytell Wireless isn't available everywhere, as a result we also offer Business Internet solutions using services from Australia's leading infrastructure providers. Where required we will provide NBN services with support provided by our Newcastle team.

### WHY CHOOSE US

We focus on small to medium business, our solutions are designed to just work.

Our delivery and support team are located in Newcastle (NSW) not overseas.

We partner with your IT providers to make sure the solution fits your needs and budget.

Our own wireless network puts us in control of the service from end to end.

### P2MP Business Internet

Performance and reliability that meets the needs of small to medium business on Countrytell's own network.

### Unlimited Data

Every Countrytell Business Internet solution includes unlimited data ensuring consistent performance at a fixed cost.

### P2P Custom Solutions

Tailored to meet high performance requirements of corporate and government customers.

### Flexibility

Our network is designed to support flexible delivery, Internet, Ethernet, IP WAN, SD WAN, and Multi Vlan can be optioned on virtually any Countrytell service
